

ARTIST STATEMENT

WHAT

Made you go into
a creative field?

I started out dreaming of working in the animation industry, specifically 2D animated television shows. While that is still my dream job, I recognize that there are other fulfilling paths that satisfy my need to create. I pride myself on versatility.

HOW

Do you plan to
grow and
improve?

I plan to grow and improve by consistently practicing my skills, attending workshops, and graduating SCAD. I am a part of the Thematic Entertainment Design (TED) club, and I hope to be part of the Thematic Entertainment Association (TEA). With their help, and the help of SCAD, I will grow and improve.

WHY

Do you like the
visual
development
industry?

I like the Visual Development industry because it lets me express my creativity and build projects from the ground up. Pre-production is my favorite part of any project, I love taking ideas and expressing them visually.
